

FieldSpeedNet 4.0

Automatic Meter Reading Software

State-of-the Art Resource Management Software

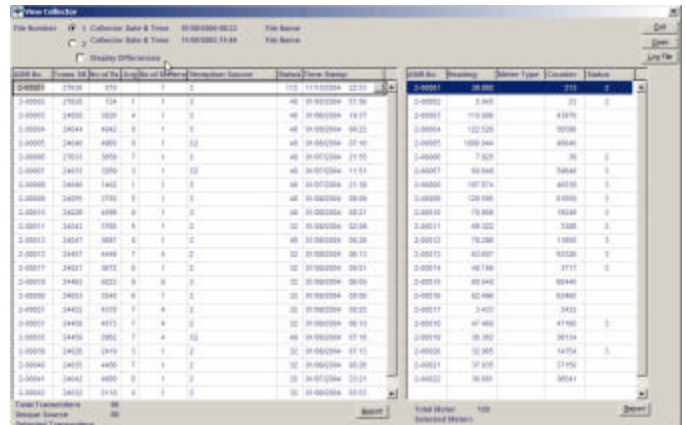

SpeedRead Technologies along with Miltel Communications provides State-of-the Art software solutions for the Automatic Meter Reading (AMR) industry. The Windows based software package allows the field technician to download and analyze the system for system troubleshooting.

Perform System Maintenance

- Update system software remotely.
- Analyze the system using the View Collector module.
- Analyze two download files in View Collector at one time.

AMR No	Trans SN	No of Rx	Avg	No of Meters	Reception Source	Status	Time Stamp
2-00001	27636	3		1	C C	112	11/10/2004 22:53
2-00002	27636	819		1	C	112	11/10/2004 22:53
2-00003	27636	816		1	C	48	10/25/2003 02:52
2-00004	24044	514		1	C C2	48	07/08/2004 08:22

- Compare transmissions and readings with two files.
- Look for consumption using the two files option.
- View the Collector event log file.
- Remotely change and update meter readings and transmitters.

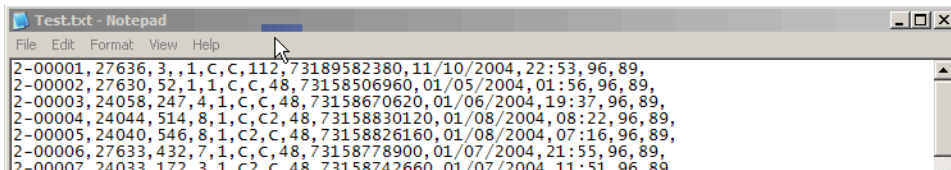

System Reports

- Transmitter reports showing late transmitters.
- Reading Reports that show consumption and meter type.

Export Data:

- Create simple comma delimited or tab delimited text files for exporting.

Minimum System Requirements

- 450 MHz Pentium or Higher Processor - ALL VERSIONS
- 128 MB RAM
- 150 MB available hard disk space (for program files only)
- Monitor with a minimum resolution of 1024 x 768
- CD- ROM
- USB Port
- Modem with an Analog Phone line
